To Whom it may concern:

I am interested in applying for the opening of "2021 Software Engineer Intern" that I saw advertised on the Indeed website with the date of February 19th, 2021

I am a student in the Computer Animation and Web Design program at the Center of Technology, Essex, where I am being trained in Web design and effective communication. I am hoping to find a position that will allow me to use these skills to the fullest extent.

I am a hard worker who enjoys a challenge and helping others. I believe I could be a valuable asset to the staff at Dealer.Com and, I hope you consider me for the position. I would look forward to an interview with you for the said job. Have a great day!.

Sincerely,
Connor, T, East
